

Rugby School

Accessibility Plan

September 2020

This document should be read in conjunction with the School's SEND Policy

This policy sets out the proposals of the school to increase access to education for disabled students in the three areas required by the planning duties in the Disability Discrimination Act 2002 and the Equality Act 2010:

- increasing the extent to which disabled students can participate in the school curriculum;
- improving the environment of the school to increase the extent to which disabled students can take advantage of education and associated services;
- improving the delivery to disabled students of information which is provided in writing for students who are not disabled.

Rugby School is an academically selective school and it is our aim to ensure that any prospective student, who fulfils Rugby School's admissions requirements, is able to come to the school irrespective of personal disability or special educational need.

Our core values are built around providing a secure, collaborative and purposeful learning culture, and whilst we have collective aims, everyone is treated as an individual. We are therefore equally ambitious for our disabled students and staff.

1. Access to the curriculum

Students with identified or suspected specific learning difficulties are supported by our Learning Development department. Rugby School's SEND Policy can be downloaded from the website.

The school has had an Accessibility plan since 2003 and since that date the following steps have been taken to improve the accessibility of disabled students to the curriculum:

- The parents of all prospective students with special educational needs, including medical or physical disabilities are encouraged to discuss their needs prior to our entrance procedures to enable us to make any adjustments that may be required;
- Students in the lower school with SEND may opt to receive learning support lessons within the curriculum at no extra cost;
- Students in the Upper School may receive support lessons at no extra cost during a study period according to need. Staff receive on-going training to enable them to understand the needs of SEND and disability including deaf awareness training;
- Individual support sheets are prepared to inform teaching staff about the strengths and weaknesses of SEND/disabled students and to offer specific guidance on appropriate adjustments and strategies for teaching;
- Creation of dedicated learning support centre to facilitate easier access to resources for staff and students;
- ICT resources have been introduced to screen for SEND in all new students to the school;

In the three year period from 2019-2022, the following developments are planned to increase access to the curriculum:

- All pupils with a disability will be observed by LD staff when sitting key internal examinations to ensure that their needs are understood and accommodated through exam access arrangements.
- More streamlined systems of reporting will be developed to enhance monitoring.
- Autism awareness sessions will be delivered to all new FB pupils during their first term.

All students are welcomed into our sports, games and extra-curricular programmes, with special attention paid and allowance made to any who have any form of disability.

2. Physical Access

Rugby is committed to improving accessibility to our buildings where ever it can. A full accessibility audit of every building has been conducted from which a programme of work has been established and is controlled by the Estate Manager. Much progress has already been made and a full summary of the building audits, the work identified and the work completed to date is contained at appendix 1.

An historic estate such as ours poses many challenges to adaptation and accessibility but none the less very many alterations have been completed to the physical environment all with the aim of adapting and making accessible as many areas as possible across the campus. It should however be noted that it may not be possible to make all areas accessible given Planning Authority and budgetary limits.

All new buildings, such as Modern Languages, the new boarding house and the new day complex are of course fully compliant with the latest Building Regulations. Where we are completely refurbishing existing buildings every effort is made to make the building as compliant as possible. Examples of this include The Music School and Science School which now have level access, disabled toilet facilities and lifts to give access to all floors following their refurbishment.

In addition to major project work the School is committed to adapting as many buildings as possible and with this in mind the Estates Department control a substantial annual budget specifically designed to fund other priority access projects. This has allowed for the construction of ramps (Bookshop, Bursary, History and Macready Theatre) the installation of lifts (Sport Centre, Design Centre and Macready Theatre) and for other programmes such as providing designated and signed disabled parking across the Estate, provision of hearing loops and for adapting and providing hand rails along with many other improvements. The Building Audits provide a clear prioritised programme of work to ensure the School is constantly improving its provision.

Improving the accessibility of the public buildings has been a primary concern. Works completed here include providing ramped access to the Bookshop, Bursary and Macready Theatre, providing disabled toilet facilities at the Temple Speech Room and Music School and providing automatic doors at the Sport Centre. After lengthy planning negotiations, a ramp was provided to another of our most historic buildings, the Temple Reading Room, the ramp also serves the History Department. After challenging planning negotiations, alterations were agreed and have been implemented to the historic Macready Theatre which will transform its accessibility and secure its future use for the wider community as well as for the school. Improvements to the theatre include a new external ramp and a lift to auditorium level with access to disabled seating.

In February 2019 the construction of a new fully accessible boarding house was completed (New House) With regard to the existing Boarding Houses, A £3.6m upgrade to Sheriff house completed in September 2020, this boys house is now fully accessible. Separately an additional girls and a boys house have been identified as most suitable for adaptation (Griffin and Michell,) and level access to the buildings has already been provided – At Michell a fully compliant bedroom with bathroom facilities has been installed along with a number of internal ramps and other alterations as part of its major house refurbishment. Elsewhere further adaptations would need to be made on a case by case basis should a student with such needs present, but by having addressed the major physical obstacle to access in these houses and in the new boarding house the School is as prepared as it can be in advance. The recently completed extension to the boys and girls day house provides fully compliant accommodation for day pupils.

The dedicated annual budget for physical adaptations is £25,000 and is managed by The Estate Manager, Judith Robinson. In addition the School regularly supports this with additional funds from the wider capital plan to achieve larger projects. The attached Building Audit and Accessibility Plan identifies the planned and completed works in the current plan period.

3. Improving the delivery to disabled people of information that is provided in writing for people who are not disabled

All written communication, either hard copy or electronic, can be provided on request in a suitable format to enable access. This includes large print and audio formats. A video link has been provided for parents at meetings if access has not been gained readily.

Authorised Compliance Committee:	
Date:	23 September 2020

Rugby School

Building Access Audit and Accessibility Plan

2020

This document was originally produced in 2002 and has been bi annually updated since then to reflect the progress made in adapting the School's physical environment.

The section coloured white indicates work still to be done

The section coloured blue indicates work that has been completed

The section coloured peach indicates items not applicable e.g. No lift required because it is a single story building.

The annual budget (£25,000 in (2018/19) is used to address items in the 'Priority 1-3 years' column.

This document is updated annually to reflect progress made.

Art & Design Centre					
The accommodation is located over two floors accessed on the ground through a T-shaped corridor. This is served by three entrances, two ramped from "The Close", and a third from the Science school at first floor level. Two staircases give access to the first floor internally at either end of the corridor. A third small stair gives access to the Media Centre on the lower ground level. There is a disabled toilet at ground level. Limited parking is provided for this building.

Macready Theatre					
<p>The accommodation is located in a Grade 2 listed building. The arrangement of accommodation is complex and located over two floors. The foyer, dressing rooms and toilets are located on the ground floor, and the auditorium on the first. The two principle entrances are located on the side and front of the building accessed from either Lawrence Sheriff Street or Little Church Street and both have steps. The main stair leading to the auditorium also serves as a fire escape and has fire doors at an intermediate landing. Other fire escape stairs are also provided and open up onto steps in all locations, there are no ramps in these areas. A disabled toilet is available to the side of the foyer and limited car parking is available on the forecourt or at the rear of the building.</p>
